Application and Construction

Designed to utilize intermediate base sockets, AlumLite 300 Series provides many desirable features. Of primary importance, is the option of an indoor (dry) or outdoor (wet) system. AlumLite has the option of different colors: Natural aluminum, satin, anodized black, anodized gold, anodized chrome, white or a custom powder coat.

Electrical

AlumLite Intermediate Base is a 120V system with the option of using 12V or 24V lamps. A transformer is not required for 120V lamps.

Lamps: You have the option of choosing from the variety of intermediate base lamps available in the market.
