Applications

Designed for indoor use, WallLite Series is ideal for many applications including the amusement, recreation, and architectural industries. WallLite is excellent for path lighting, step lighting, accent lighting, and many more applications.

WallLite is used in:

- Restaurants
- Casinos
- Retail Stores/Shopping Malls
- Hotels
- Movie Theatres and many more

Electrical

WallLite is a 12 volt system which consumes only .45 Watts per LED. WallLite requires a 12V (secondary side) transformer. The recommended transformer size is 300 Watts with six 5-Amp circuits that provide extra protection against short circuits or malfunctions. Each 5-amp circuit protects each section while allowing other sections to operate when there is a problem in a single section. See transformer brochure for additional info.
